CHAPTER 1 – AGRICULTURAL LAND, LABOUR FORCE AND HOLDINGS	
1.1 Full-time and part-time farmers, livestock and poultry breeders by sex and age group	3
1.2 Type of agricultural land by district	4
1.3 Type of agricultural land by locality	5
1.4 Distribution of agricultural holdings by region	6
1.5 Distribution of agricultural holdings by region	6
CHAPTER 2 – VINEYARDS	
2.1 Total area, number of vines and production of grapes by region	9
2.2 Area, number of vines and production of grapes by locality	10
2.3 Percentage coverage of area, percentage of vines and percentage production of grapes by region	12
2.4 Area under vineyards by type and region	12
CHAPTER 3 - THE PIG INDUSTRY	
3.1 Number of farms by pig population	15
3.2 Swine population by type	16
3.3 Slaughtering of swine (heads)	17
3.4 Slaughtering of swine (kg)	18
CHAPTER 4 - THE CATTLE INDUSTRY	
4.1 Number of farms by cattle population	21
4.2 Cattle population by type	22
4.3 Slaughtering of livestock – cattle (heads)	23
4.4 Slaughtering of livestock – cattle (kg)	34
CHAPTER 5 – OUTPUT OF THE AGRICULTURAL INDUSTRY	
5.1 Wholesale quantity of vegetables sold through organised markets 1996-2001	27
5.2 Wholesale value of vegetables sold through organised markets 1996-2001	28
5.3 Monthly wholesale quantities of vegetables sold through organised markets 2001	29
5.4 Monthly wholesale value of vegetables sold through organised markets 2001	30
5.5 Wholesale quantity of fruit sold through organised markets 1996-2001	31
5.6 Wholesale value of fruit sold through organised markets 1996 - 2001	32
5.7 Monthly wholesale quantities of fruit sold through organised markets 2001	33
5.8 Monthly wholesale value of fruit sold through organised markets 2001	34
5.9 Average wholesale prices of marketed fruit and vegetables	35
5.10 Total estimated output of fruit and vegetables	37
5.11 Total estimated value of fruit and vegetables	39
5.12 Slaughtering quantities (carcass weight)	41
5.13 Monthly slaughtering quantities 2001 (carcass weight)	42
5.14 Slaughter values of animals slaughtered at licensed slaughter houses	43
5.15 Monthly slaughtering values 2001	44
5.16 Estimated quantity of milk production	45
5.17 Monthly egg production	46
5.18 Monthly milk intake	47

	Page
CHAPTER 6 - AGRICULTURE INDICES	
6.1 Vegetables: Price Index	51
6.2 Fruit: Price Index	57
6.3 Vegetables: Volume Index	61
6.4 Fruit: Volume Index	67
6.5 Annual slaughtering production volume index (1995 = 100)	71
6.6 Monthly slaughtering volume indices: January - December 2001 (1995 = 100)	72
6.7 Dairy milk intake volume index (1995 = 100)	73
6.8 Egg production volume index (1995 = 100)	74
6.9 Monthly and annual producer price indices for agricultural products - 2001 (2000 = 100)	75
6.10 Monthly and annual input price indices for agricultural products - 2001 (2000 = 100)	77
CHAPTER 7 - ECONOMIC ACCOUNTS FOR AGRICULTURE	
7.1 Value added account for agriculture 2001	81
7.2 Components of the net value added	82
7.3 Components of gross agricultural production - 1999	83
7.4 Components of gross agricultural production - 2000	84
7.5 Components of gross agricultural production - 2001	85
7.6 Components of intermediate consumption 1999 - 2001	86
7.7 Components of gross production 1999 - 2001	87
CHAPTER 8 – FISHERIES	
8.1 Fishing fleet by licence	91
8.2 Fishing fleet by length classes (m)	91
8.3 Fishing fleet by type of fishing vessel	91
8.4 Fishing fleet by fishing gear	92
8.5 Value of fish landings at wholesale market: 1996 - 2001	93
8.6 Quantity of fish landings at wholesale market: 1996 - 2001	94
CHAPTER 9 – POULTRY CENSUS	
9.1 Distribution of poultry farms by farm size (m ²)	97
9.2 Distribution of poultry farms by farm size (m ²)	98
9.3 Distribution of poultry farms and area by farm size (m ²)	100
9.4 Distribution of poultry farms by farm size (m ²) and type of tenure	101
9.5 Distribution of poultry farms and area by farm size (m ²) and type of tenure	102
9.6 Distribution of poultry farms and are by farm size (m ²) and legal status	104
9.7 Distribution of sole holder poultry farms by farm size (m ²)	106
9.8 Distribution of poultry farms by farm size (m ²) and type of activity	107
9.9 Distribution of poultry farms by farm size (m ²) and type of activity	108
9.10 Broiler farms by farm size (m ²)	109
9.11 Layer farms by farm size (m ²)	111
9.12 Broiler/layer farms by farm size (m ²)	113
9.13 Distribution of poultry farms with/without silo by farm size (m ²)	115

	Page	
9.14	Distribution of poultry farms by type of tenure	116

Foreword

The agriculture and fisheries sector might be deemed to be a relatively small contributor to the Gross Domestic Product. However, its strategic importance to the economy and the country as a whole cannot and should not be underestimated. It is believed that this perspective of this sector is amply borne out by the data sets that are being presented in this second edition of this publication.

After its re-introduction within the national statistics programme, the Agriculture and Fisheries Unit of my Office has managed to put together a dynamic, varied and relevant statistics programme that provides a good information system on the sector and which provides for international comparability of the available data. Therefore, I submit that this programme provides policy-makers, researchers and those earning their living within the sector with the required tool for a very serious evaluation of this sector and relevance to the different stakeholders.

The investment that went into the production of the information contained in this publication was substantial. Therefore, it is earnestly hoped that it will be used wisely and profitably for the good of the sector and those that are dependent on it.

Alfred Camilleri
Director General

COMMENTARY

INTRODUCTION

The necessity of providing agricultural data to the users is unquestionable. This is the second year that the National Statistics Office is compiling the Agricultural publication. Two new chapters have been added, the Economic Accounts for Agriculture and the Poultry Census. All other Chapters have been updated.

CHAPTER 1 - AGRICULTURAL LAND, LABOUR FORCE AND HOLDINGS

The data in this chapter is based on the Agricultural Census which was carried out in October 2001. Table 1.1 refers to all agricultural workers that were engaged in any agricultural activity during the full year prior to the Census date. On the other hand, the agricultural land area refers to 1st October, 2001 – the Census date.

For census purposes, the term 'Dry land' refers to the agricultural land area which depends on the rainy season and only one cycle is grown in this land area. 'Irrigated Land' is the agricultural land which has a continuous supply of water all the year round, irrespective of whether it has a natural spring, served by second class water or water supplied by any other source. It is normal practice that on 'irrigated land' more than one crop cycle is used during the period of one year. 'Garigue land' is land area managed by the holding but cannot be cultivated because of the scarcity of the soil or is of a rocky nature.

'Agricultural holding' is a unit having a single management and which produces agricultural products. An agricultural holding may be engaged in more than one activity, farming land, livestock or both.

CHAPTER 2 - VINEYARDS

The data refers to the Census of Agriculture which was carried out in October 2001. No thresholds were applied and the data collected refers both to commercial vineyards for wine production and vineyards for table grapes. The vineyards were classified in three categories, quality vineyards, non-quality vineyards and vineyards for table grapes. Whilst the term 'Quality vines' was used for the international varieties, non-quality vineyards was the reference used to all other vineyards which are grown for wine making. Vineyards for table grapes are all other grapes which go directly to the consumer.

CHAPTER 3 - PIG INDUSTRY

Data relating to the pig industry refers to the Census of Agriculture which was carried out in October, 2001. A total of 157 holdings were operating during this period. The pig industry in Malta is regulated by a quota system, whereas, the quota determines the number of pigs to be slaughtered by a license holder. For census purposes, the physical aspect of the farms was taken into account. A holding may have more than one quota on the same farm.

Slaughtering statistics are compiled on a monthly basis and are derived from the official records kept at the Veterinary Services.

CHAPTER 4 - CATTLE INDUSTRY

A head count of the cattle population was carried out during the Census of Agriculture carried out in October, 2001. No thresholds with regards to head count were applied. A holding may have more than one quota on the same farm.

Slaughtering statistics are derived from the official records kept at the Veterinary Services and compiled on a monthly basis.

CHAPTER 5 - OUTPUT OF AGRICULTURAL INDUSTRY

Tables 5.1 to 5.8 refer to the total wholesale quantities and values of agricultural produce passing through the official wholesale markets. The average wholesale prices of marketed fruit and vegetables, which is shown in table 5.9, is the total annual unit price per kilogram.

The total crop production shown in Tables 5.10 and 5.11, were compiled using the actual marketing data together with the official potato export, industrial supplies, direct sales to the consumer and farm consumption. Two commodities which go directly from the farmer to industry are grapes and tomatoes.

CHAPTER 6 - AGRICULTURE INDICES

Agricultural price indices are used in relation with the analysis of price developments over a number of years. The field of observation for a price index covers all goods and services for which it is desired to measure price trends. The selling prices of agricultural products and purchase prices of the means of agricultural production provide information on trends on prices.

The agricultural price indices on specific sectors have been compiled since 1995. The prices are obtained from organized markets of fruit and vegetables, the department of veterinary services and dairy plants.

The producer price index for agricultural products (Table 6.9) is a similar index that uses the same sources for information but provides a level of indices on a broader level. This type of index was introduced in 2000. The producer price is the price received by the farmer without deducting taxes and without the inclusion of subsidies. The Input price index (Table 6.10) measures trends in purchase prices of certain goods and products used to produce agricultural products. Both these indices have been compiled with a base year 2000.

The Producer Price Index for agriculture relates to sales of agricultural produce outside of the agricultural industry, while sales of agricultural produce to other agricultural units are not taken into consideration. This concept is known as the '*National Farm*' concept.

CHAPTER 7 - ECONOMIC ACCOUNTS FOR AGRICULTURE

The main purpose for compiling the Economic Accounts for Agriculture is to analyze the production process and the income generated by it. The income generated by it, or in other terms, the Net Value Added, is an extremely important figure as it enables policy makers to analyse trends within the agricultural industry and also comparisons of income generation by the agricultural industry when compared to other sectors within the economy. The agricultural industry is treated as a grouping of all KAU's (kind-of-activity units).

The first set of economic accounts that was based on the European System of Integrated Economic Accounts (ESA) was compiled in 1999 and this publication has Economic Accounts for Agriculture until 2001.

The production account can be split into two parts. Total output of agriculture, which was compiled using statistical data from:-

- *Organised markets*
- *Department of Veterinary Services*
- *Dairy Industry*
- *Extensive surveys*
- *Other administrative sources and expert estimates.*

The input side of agriculture was compiled using:

- *Imports data*
- *Business statistics*
- *Extensive surveys*
- *Other administrative sources and expert estimates.*

The Net Value Added is the difference between total Output and Intermediate Consumption after providing for Consumption of Fixed Capital. The net value added is the summation of all the returns to all the factors of production within the agricultural sector.

CHAPTER 8 - FISHERIES

Data for fishery statistics is compiled from administrative registers kept at the National Aquaculture Centre at the Ministry of Rural Development and Environment. The update of data is an ongoing process and the database, the MaltaStat-Fishing Vessel Register, was established in collaboration with FAO.

According to fisheries regulation, fish caught by local fishermen has to be sold through the wholesale Fish market. Statistical data for fish landings is collected through the daily returns and compiled on a monthly basis. All dealers in fish are registered with the Fisheries Department.

CHAPTER 9 - POULTRY CENSUS

A comprehensive Poultry Census was carried out at the end of 2002, with a census date as at 1st September 2002. Although 330 farms were licensed to operate during the year 2002, 268 farms were found to be active during the period covered by the Census.

All farms were physically inspected by interviewers and their locality was plotted on a GIS based map. The census not only covered a head count on census date, but also took into account the structure of the farms and the labour force.

Since the poultry farms are operated on an average of five cycles annually, with a resting period of four weeks between one cycle and the other, some farms were found to be empty. Hence, to determine the population on a date, one should take into account both the population on census date together with the "last head count"

Chapter 7 - Economic Accounts for Agriculture

This is a blank page

7.1. Value added account for agriculture 2001

Input	Value (Lm '000)			Gross Production	Value (Lm '000)		
	1999	2000	2001		1999	2000	2001
Cropping							
Imported seeds and planting stock	1,970	2,000	1,967	Livestock products	23,445	22,683	23,930
Fertilisers and soil improvers	1,236	1,115	1,096	Beef	2,122	2,088	1,762
Plant protection products	420	517	508	Pork	8,412	7,805	8,143
	314	368	363	Sheep and Goats	217	215	215
				Horse-flesh	28	45	64
Animal feed	16,598	15,385	16,779	Poultry	4,990	4,642	4,857
Fodder supplied by other holdings	1,704	1,790	1,687	Rabbits	7,677	7,888	8,889
Compound feedstuffs	14,894	13,595	15,092	Other animal products	14,563	14,438	14,268
				Milk	7,166	7,251	7,291
Energy and lubricants	2,380	2,243	2,379	Eggs	3,114	3,189	2,871
Electricity	408	390	414	Cheese	3,948	3,648	3,756
Fuel	1,972	1,853	1,966	Hides and skins	335	350	350
Various services	7,916	7,417	7,895	Crop products	26,204	22,836	24,500
Maintenance of materials	2,889	2,712	2,849	Forage	1,813	1,887	1,772
Maintenance of buildings	1,396	1,231	1,362	Vegetables	21,163	17,923	19,564
Veterinary services	571	551	613	Fruits	2,463	2,382	2,169
Agricultural services	3,060	2,923	3,071	Flowers and seeds	672	852	903
				Other seeds for plaiting	93	93	93
Intra-unit consumption	529	515	485	Wine	355	305	226
Seeds	93	93	93	Gross production	64,567	60,262	62,924
Milk	202	208	211	Other subsidies on production	300	300	300
Grapes	126	117	97	Losses	1,989	2,000	2,220
Fodder	109	97	85	Net Production	62,878	58,562	61,004
Fixed capital consumption	1,838	1,727	1,811				
Net value added at basic prices	31,647	29,275	29,688				
	62,878	58,562	61,004				

Note: Figures may not add up due to rounding.

7.2. Components of the net value added

Item	1999	%	2000	%	2001	%
Net value added at basic prices	31,647	100.0	29,275	100.0	29,688	100.0
Entrepreneurial Income	29,390	92.9	26,838	91.7	27,411	92.3
Compensation of employees	1,000	3.2	1,015	3.5	995	3.4
Interest paid	732	2.3	897	3.1	755	2.5
Rents paid	526	1.7	526	1.8	526	1.8

Broilers + 6 Weeks	60	70	49	-	1,727
Turkeys Day old	9	-	0	67	-
Turkeys Broilers - 1 Day - 3 Months	107	-	5	-	-
Turkeys Broilers - 3 Months - 5 Months	-	4	1	-	61

Note: On the day of the survey there were a number of farms that had no poultry as these farms would be passing through a RESTING PERIOD. The last head count refers to the amount of poultry on the farm before the resting period. These are NOT farms that are inactive. Inactive farms are those farms that have a license to operate but for some reason or another are not operating in 2002.
